Hon. Secretary's Message

Dear Reader,

Warm Greetings at the beginning of the new academic year!

Today, the role of an educational institute is not only to pursue academic excellence but also to motivate and empower its students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. The economy of the future will demand different competencies and knowledge of a global workforce. Our students have to possess the future-skills mindset and resilience to adapt and face new challenges. Being the Management of an educational trust, we have to continuously make untiring efforts to inculcate strong values in our students that would help them to distinguish right from wrong and make the world a better place to live.

I am pleased to state that our Trust has very successfully completed 74 glorious years spreading the light of knowledge and information in all directions. Academic merit of all our institutions go hand in hand with excellence in extra-curricular activities, sports and outreach programmes conducted by our students from schools to colleges, management institutes & media college. We impart education with a difference, striking balance of modern and traditional. Our splendid infrastructure, well equipped labs, an educational outlet & a health Centre have been praised by one and all visiting our campus.

To create global attitude in students, we have encouraged various activities in our educational institutions right from the school level. Mainadevi Bajaj International School (MBIS) and Ramniwas Bajaj English High School (RBHS) are members of EUMIND (Europe meets India). Every year, groups of students from both the schools participate in preparing projects in collaboration with European schools. They have many times participated in interactive video-conference with partner schools of Europe and have also won certificates of excellence for the projects assessed by International Jury. This year, MBIS invited Ms Noa de Zeeuw, the Coordinator of EUMIND (Junior), Europe. EUMIND students of MBIS & RBHS received their certificates of excellence at the hands of Ms Noa. Durgadevi Saraf Global Business School invited Ms. Andrea Kuhn, the Consul General of South Africa, who spoke on the topic 'G20 Leadership-India & South Africa Partnership Poised for Exponential Growth'.

We give major emphasis on continuous improvement of our students not only in academics but also nurture their leadership traits. Therefore, students are given the duty of organizing seminars, conferences and extra-curricular events under the guidance of in-charge faculty. To make holistic development of students, they are encouraged to participate in the outreach programmes through NCC, NSS, DLLE units, Women Development Cell and Rotaract Club.

Alumni serve many valuable roles, such as helping to build and grow an institution's brand through word-of-mouth marketing. Positive posts on social media can enhance the image of an institution. Institutions can also rely on alumni to provide mentoring, internships, and career opportunities to students and fundraising. We have Alumni Associations in most of our institutions. The Alumni Meet and Greet for Durgadevi Saraf Institute of Management Studies was held on 13th May 2023 from 7.30 to 10 p.m. at Durgadevi Saraf Hall. Similar Alumni Meets were also organized by Ghanshyamdas Saraf College and Durgadevi Saraf Junior College.

Online learning has become an integral part of education. Hence, in addition to the regular offline lectures, special talks and sessions are

Kailash Kejriwal, Hon. Secretary, RSET

organised from time to time on desired topics through digital platforms like Google and Zoom in institutions of higher education. Students are facilitated with free online tutorials by college faculty through specially recorded lectures on Gold Academy's portal. Overhead Projectors are installed in every classroom to break the monotony of learning through chalk & duster. This not only enables inclusion of PPTs, videos and conducting quiz in lectures but also encourages students to participate in individual / group presentations related to their course. To make the students industry ready, some innovative methods are initiated by the colleges & management institutes. These include talks by Industry experts, Industrial Visits, collaboration by way of MOU's with reputed organisations.

Research is important for any academic institute of higher education. In the past few months, many of our faculty members have attended prestigious conferences and presented research papers. Some of them have also been awarded by 'Best Paper Award'. Durgadevi Saraf Institute of Management Studies and Ghanshyamdas Saraf College are approved research centres by Mumbai University and many research scholars are pursuing research for Ph.D degree in both the institutions.

I am very happy to state that our students are nurtured to develop excellence in various sports at Pravinchandra D. Shah Sports Academy. Students of our institutions have won many prizes at State and National level sports competitions. The Sports Academy also organized summer camp in the months of April- May which was met with overwhelming success and response.

I take this opportunity to thank each and every Donor, past and present Trustees, Managing Committee members and well - wishers who are involved in the development and progress of the educational activities of our Trust.

For all our Institutions, the months of April, May and June are fully loaded with Academic activities. Right from conducting end of term exams from the 1st week of April to declaring results were conducted smoothly and we are happy to announce that we are extremely happy, as all institutions of RSET did extremely well in imparting the quality T-L process to our students.

The ICSE batch of 2023 made us extremely proud with their fabulous results. The topper of the school scored 98.6% followed by two other students who scored 98.4% and 98% respectively. The overall performance of the students was commendable. All our students passed with the distinction grades. There was no student who scored less than 80%. This was possible due to a team of highly dedicated Principal and who guided the students towards their academic success.

The IGCSE results are also a showed a firm resolve from teachers who have diligently prepared the students for their examinations and all of them have come up with flying colours ensuring 100% results and again majority of them scoring 90% and rest in distinction.

As part of Educational trips, large number of students from various grades have taken part in educational tours and visited the interesting places near Mumbai as well as across the country. One such tour was organised for the grades 8-10 who went on an Edutour to Dehradun Mussorie for 5 days. The most impactful place was the visit to IMA (Indian Military Academy) they interacted with the cadets and officers and came back impressed with their dedication and focus.

One more memorable event was hosted by our International School MBIS. Ms Noa de Zeeuw, the Coordinator Eumind (Junior) Europe was

hosted by the school and our students put up a short presentation of their learning from the EUMIND projects. They received their certificates of excellence at the hands of Ms Noa.

At RSET each institutions is trying to connect with its old students. At every Alumni Meet, it is observed that, Alumnis were very happy to join in. In one such event that was recently organised by DSIMS, that began with the tradition of singing the National Anthem followed by brief from, Director - DSIMS. The volunteer's students took the stage and made sure that there wasn't a dull moment on the floor. They thoroughly enjoyed the get together and remembered the good old times while speaking to their teachers.

We at RSET have celebrated International Yoga Day in a grand way. Every institute has participated with an emphasis as "The aim of yoga is control over the mind". Various yoga trainers have also taken part with great enthusiasm and made this event successful. It all started with warm-up to doing yoga in various forms and different Aasanas, including Surya Namaskar and concluding the event with a good meditation session that calmed & relaxed the mind of the participants.

RSET's Nalini Shah Music Academy (NSMA) was established in the year 2020 which is providing holistic learning of Music to educate our students and make them technically and professionally stronger and more proficient in the field of Music. Recently students of NSMA participated in the recording session where students have been given chance to sing for a TV serial with notable singer Anup Jalota.

Our both the Hostels viz; Jankidevi Bilasrai Bubna Boys' Hostel and Draupadidevi Sanwarmal Womens' hostels are equipped with the state of art facilities including fully air conditioned rooms. These Hostels are abode to not only the Indian Students but many foreign students. The feedback received from the parents of these students gives us immense happiness as they are more than satisfied with the facilities which are being offered to them in a City like Mumbai where the good accommodation is at a premium price.

In addition to above mentioned things, we at RSET gives lot of emphasis through our institutes on the social initiatives like beach cleaning, tree plantation, NCC, NSS, seminars, workshops, career counselling and guidance, health check-ups of each and every students, PTA Meetings, Regular Governing Council Meetings and College Development Committee Meetings, etc etc.

Suwadevi Doongermal
Patodia Lab
at MBIS

Dear Reader,

Warm greetings to one and all at the beginning of this new academic year!

The study of natural sciences always requires hands-on practical experiments. For the proper understanding of chemical reactions, practical experiments are required through which students directly and safely investigate chemical properties and reactions by utilizing laboratory apparatus and instruments. These activities are essential for learning chemistry and improving science literacy. Therefore Suwadevi Doongermal Patodia Chemistry Lab of Mainadevi Bajaj International School is extremely useful for the students as it allows students to explore chemical concepts, view changes in matter, and acquire scientific skills in an atmosphere similar to a professional scientific environment. It is interesting to note that students of Grade 9 found some of the experiments interesting and enjoyed conducting them such as endothermic reaction and exothermic reaction, tests with water (checking the presence of water in a given compound using copper sulfate), reversible and irreversible reaction, formation of ammonia fountain and to know the properties of ammonia, formation of salt using metal oxide and acid and many such experiments that are in their syllabus. The students are duly supported by the Lab Assistant who keeps the lab-ready well in advance with types of equipment and chemicals.

I am pleased to know that MBIS welcomed Ms. Noa de Zeeuw, the Program Coordinator of EUMIND Junior (Europe Meets India). The EUMIND achievers of Mainadevi Bajaj International School & Ramniwas Bajaj English High School were felicitated by Ms. Noa at a special assembly. The ICSE batch of 2022-23 of MBIS has achieved 100% results in Grade 10 for which the Principal, teachers, and students deserve special compliments.

I take this opportunity to convey my best wishes to all the institutions of RSET for their further progress and development.

I am happy to know that the Health Centre is running successfully through Ayaksha, the Agency entrusted to run the Health Centre and is able to address the health issues of the school children. Renowned doctors are visiting the health centre regularly and are advising the students on health related problems. Ayaksha is also conducting Disaster Management Program that includes mock drill for fire fighting for which a group of teachers from each institution are being trained by them.

It is a matter of great pleasure that all the institutions have conducted many noteworthy extra-curricular activities. CO-CURRICULAR

"Teachers can change lives with just the right mix of chalk and challenges"

The school looked forward to yet another promising academic year 2023-24 and reopened for all students from Primary to Secondary on 5th June, 2023. In the pursuit of creating awareness towards environmental issues on the occasion of World Environment Day was celebrated on 5 June 2023. The theme agreed upon was 'Only One Earth' in compliance with the UN Goal 12 - Responsible Consumption and Production. The students were educated on the use of tissue papers and its adverse effects on the environment. They pledged to do their bit for the environment and other forms of life in it. Pledge by the students was the highlight of the event. The secondary students kick started the goal of creating a kitchen garden in school. While students brought soil from home, the teachers provided organic seeds for brinjal, coriander and chilli plants. Every pot was marked with the grade and students were appointed to look after the pots. The preprimary students have been taught to segregate wet and dry waste in school and their wet waste will help us generate compost for our plants.

The month of June also witnessed the celebration of International Yoga Day which was held across different grades in the school premises on June 21st, 2023 with great enthusiasm and vigour. The students demonstrated various asanas followed by pranayam, meditation and relaxation. All the students performed musical power yoga with all the benefits of yoga imbibed

in them. The celebration concluded with active participation by our Principal, teaching and non-teaching staff.

The theme for this Socially Useful Productive Work was Best out of waste. The students brought the waste materials and with their creativity turned them into beautiful lost and found boxes, wall hanging, fridge magnet and name plates. This showcased an innovative way of doing things which helped them to enhance their creativity and presentation skills, along with creating awareness on the importance of recycling and reusing waste materials available.

The hobby clubs began their first session for middle school and there were myriad activities that excited everyone. While the Earthlings worked on their kitchen garden, the Incredibles dished out a cheesy snack for a rainy afternoon. There were creative name plates and decorative wall pieces. The Khel Khelo club played the age-old dog and the bone and the Thinkers' Paradise indulged in Taboo.

The Ballot is stronger than the bullet

Campaigns and polling booths came calling to RBHS when the Student Council members were elected. Student council elections encourage students to be good sailors while cruising through the ocean of life. Developing hobbies, refining them, learning basic etiquettes, getting skilled at multitasking, developing social skills are some of the many things that a school equips a child with. The thread of the growth of society

depends upon the quality of education that is being imparted. We mould a nation's future by facilitating all round development of its future citizens.

We, at RBHS not only develop self-dependency but also fulfil dreams and ambitions, build confidence, make a fairer world and underpin human progress. To make the children of today responsible citizens of tomorrow, the Junior Council Election Process was conducted for grades 4 to 10 where the Jr. Deputy Ministers and House Vice Captains were to be elected from grade 4 and Junior Ministers and House Captains from grade 5. To make the students industry ready some innovative methods are initiated by the college. These include talks by Industrial experts, Industrial Visits, collaboration by way of MOU's with organisations such as TISS, TNS India Foundation, Fin X, BSE, SDVTII for English Speaking, Advanced Excel, E – Taxation, GST, Tally Certificate Courses, CIMA UK for FLP(Finance Leadership Program), Ambition Learning Solutions for Financial Literacy workshop, TEL (Train, Earn and Learn) program by WIRC, ICAI and Panandro Education Technologies for Placement Oriented Skill Development Course.

The quarter from April to June bring along the results for multiple pan India Board examinations and competitive examinations. It a phase of jubilations and despair and new hopes for all the students. RMCC has been conducting Career assessments and counseling for hundreds of students across all age groups to guide them with their way forward.

RMCC conducted a 'Career Planning after 10th and 12th Seminar' on Sunday 2nd April with Indian Airlines Ideal School in Kalina in collaboration with Sahyog Foundation. The seminar focused on helping the students and parents understand the importance of career counseling and guidance. The purpose of the seminar was to help students about the importance of career assessments and early career planning to make informed career decisions. More than 150 students and their parents attended the seminar. They were provided with a brief of the streams and degree options post 10th and 12th. In addition to this, the different subject combinations, unconventional career options post 10th, 12th and graduation courses were discussed. The career counseling process at RMCC and the details of it were discussed with the students. Videos to reiterate the importance of career counseling were also shown to them. The participants were very active during the questions and asked multiple questions related to their careers which were addressed during the seminar.

June is also the month of beginning new Academic session across schools with students excited to meet with friends after vacation and

look forward to new learnings. RMCC conducted orientation session for RBHS students informing parents and students how counseling will assist students who face any academic and behavioural challenge.

The counsellors conducted a workshop on Signs and Symptoms of Learning Difficulty at St. Mary's High School on 13th June 2023 the teachers not only learned about identifying learning difficulties and implementing interventions but also expressed their need for counsellors within the school setting. They recognized the importance of having counsellors as a valuable resource to facilitate communication between parents and teachers, particularly when addressing the concerns of students with learning difficulties.

Teachers acknowledged that open and effective communication with parents is crucial in understanding a student's unique needs and developing appropriate strategies to support their learning journey. They recognized that counsellors play a vital role in bridging this communication gap, acting as intermediaries who can facilitate productive discussions between parents and teachers.

The orientation on Understanding Separation Anxiety among Toddlers conducted by the RMCC on 14th June 2023 was a valuable and informative session for the parents. The session began with a warm welcome and an opportunity for the parents to express their feelings. Since the session aimed to explain separation anxiety, it was important for parents to identify and acknowledge their own emotions.

The focus of the session was on understanding different temperaments in students and how they cope with emotions in their own unique ways. The parents were provided with insights into age-appropriate fears and the various causes

of these fears. They were also guided on how to strike a balance and support their children effectively.

Throughout the session, parents shared their personal experiences, allowing for a fruitful exchange of strategies and insights. Real-life situations were presented as examples to help parents better understand and relate to the topic. Additionally, the session emphasised the potential escalation of separation anxiety and provided guidance on when it might be necessary to seek professional help.

The parents learned valuable coping mechanisms that could assist their children in managing separation anxiety. Behavioural strategies were also discussed to help parents create a supportive environment at home and aid their children in dealing with anxiety.

RMCC has conducted remediation session for students facing academic challenges and assist them to integrate with main stream. The Senior Counselor conducts Life Coaching sessions. “

“Summer camp is a great opportunity to explore new things or dive deep into areas you love”

PDSA has gone a long way to develop talents of students in sports by providing all possible facilities to the students. Throughout the year, PDSA has been organizing many interschool competitions and our PDSA teams have made us proud by winning championship in Football, Basketball, Kabaddi and other games as well as in Martial Arts and Swimming.

After the academic year ended, PDSA started its summer camp in the months of April & May. The summer camp in PDSA was functional from 17th April 2023 till 31st May 2023.

Summer camp is filled with breaking rules and standing apart ignoring your head and following your heart. Summer camp included various activities like basketball, cricket, football, table-tennis, chess, martial arts and gymnastics. Fun filled activities for the enthusiastic children during the holidays gave them an opportunity to learn new skills and excel in sports.

The camp aimed at keeping the students engaged and provided them an even platform to explore and express their creativity in any form as per their interest. They not only made memories while having fun but they were able to overcome their fears, try new thing, pushed their boundaries and realized self-sufficiency. They were able to make new friends amidst lot of fun and learnt team spirit and be more confident.

Sports teach children the importance of work ethic. Not only do most coaches reward hard work ethic, but also, children see their hard work pay off in their performance. The harder they work, the faster they improve.

Responsibility and work ethic are important because both qualities are necessary for success in all aspects of life whether it be career, academics, relationships, or otherwise.

Children who develop a sense of responsibility at sports camps by following the instruction of the coaches and arriving to the training sessions on time demonstrate this same sense of responsibility later on in life in the workplace. They follow the instructions of their bosses and show up to their shifts on time and ready.

Furthermore, the same responsible habits benefit children in the classroom. Sports camps teach children to show up to their classes on time and follow directions in the classroom. Such habits ultimately lead to their academic success.

Children who participate in sports camps learn important social skills such as leadership skills. Most participants arrive at sports camps without knowing anyone and are forced to interact with new people and make new friends. Many sports camps even require camaraderie and communication to achieve the maximum benefits of the camp and therefore organize activities and excursions to help campers bond.

One of the many benefits of sports camps is that they have the capacity to reduce athlete burnout and ensure that children to continue to practice their sport and live happier and healthier lives.

The Emerging Higher Education Landscape: Navigating Trends and Possibilities

Priyanka V Singh,
Regional Head, Government Projects
Phygitech Learning Solutions

In ancient times in India, the initiation marked the commencement of early education, overseen by a guru or mentor. Knowledge was imparted through the Gurukula system, and the Guru - Shishya relationship held paramount importance. In the present day, the education landscape in India confronts a range of challenges and prospects. These encompass enhancing accessibility and quality, minimizing disparities and student dropouts, boosting enrolment and completion rates, enriching learning outcomes and employability, reinforcing governance and accountability, fostering innovation and technology, and dealing with the repercussions of the COVID-19 pandemic. India's education system is currently undergoing a substantial transformation, prompted by dynamic shifts in societal needs, technological advancements, and the imperative to equip students for an intricately interconnected and globalized world. The traditional educational model is evolving to effectively address novel challenges and opportunities, with the aim of nurturing critical thinking, innovation, and pragmatic skills.

The emerging higher education landscape aligns with the digital era and the tech-savvy nature of present-day students. It harnesses the power of cloud computing, social networks, mobile technology, and big data to establish digital learning ecosystems catering to entrepreneurial learners. These learners are empowered to construct their own educational journey based on their specific objectives. This new landscape may not necessarily adhere to the traditional

study model. Instead, students determine their own pace, advancing not through conventional semesters but as they master distinct competencies.

Integration of technology has become an essential aspect of higher education, fundamentally altering how students engage with educational content and learn. Online learning platforms, digital materials, virtual classrooms, and interactive simulations are redefining the conventional classroom experience. This article explores the key facets of the evolving education system in India and highlights the initiatives and trends that are shaping its future.

The surge of learning available on demand

Given the ever-changing nature of the higher education sector, it can be challenging to navigate the shifting terrain and ascertain which choices are most suitable for prospective learners. With the proliferation of alternative models, institutions must find methods to assess the advantages of different qualifications. By aiding students in pinpointing distinct career trajectories and the competencies desired by employers within these trajectories, students can enroll in the appropriate courses to enhance their prospects for employment opportunities.

Redefining Pedagogy

One of the most prominent changes in India's education landscape is the shift from

rote learning towards a more learner-centric approach. Educators and policymakers are recognizing the importance of nurturing creativity, problem-solving abilities, and practical skills. This transformation involves moving away from a system that emphasizes memorization to one that encourages analytical thinking, collaboration, and experiential learning.

Lifelong Learning and Skill Development

The traditional model of education is shifting towards a concept of lifelong learning. The rapid pace of technological advancements requires individuals to continuously update their skills to remain relevant in the job market. Micro-credentials, skill centric courses, and boot camps are gaining popularity as they offer focused skill development. This trend aligns education with the demands of a dynamic and ever-changing job landscape.

For instance, the New Education Policy (NEP) provides students with flexibility, enabling them to determine their learning paths and programs. This empowers them to chart their own life journeys based on their unique talents and interests. The policy emphasizes that this approach grants students the chance to gain a comprehensive and interdisciplinary education in addition to focusing on their chosen major and minors, as per their preferences (NEP 2020: 37). Consequently, the shift towards lifelong learning will compel educational institutions to reconsider their teaching and professional

development strategies. This adjustment is essential to facilitate continuous knowledge and skill enhancement for students. In the upcoming years, the process of teaching and learning will not rely on traditional materials like books and notes. Instead, it will be driven by practical experience, expertise, and competency.

Digital Integration

The integration of technology in education is another pivotal aspect of the evolving system. The rise of digital platforms, online courses, and virtual classrooms has enabled students to access a diverse range of educational resources beyond traditional textbooks. This democratization of knowledge allows for personalized learning experiences, catering to individual learning styles and paces. Furthermore, technology equips students with digital literacy skills crucial for success in the modern world. The idea and objective focus of NEP will be achieved by adoption and extensive use of Technology, using Learn by Doing based approach. With the convergence of technologies, it has become imperative to integrate all possible information and communication technologies. Additionally, focus on 4C's of 21st century skills including Critical Thinking, Communication, Collaboration and Creativity including Design-thinking based Innovation approach to connect Curriculum with real life scenario. This will be key to the widespread infusion of technology enabled practices in the educational system. This will also help and amaze students with the concept of innovation and interactive learning process and result not only in better concept framing and better education but in the levels of enhanced performance and learning levels as well.

Interdisciplinary Education

Breaking down the silos between disciplines, interdisciplinary education is gaining traction. Complex real-world challenges often require knowledge from multiple fields, making interdisciplinary approaches essential. Universities are offering flexible curricula that allow students to combine subjects, encouraging critical thinking and creativity while preparing them to tackle multifaceted issues. In an increasingly interconnected world, higher education is becoming more global. Institutions are focusing on fostering international collaborations, offering study abroad programs, and attracting students from diverse backgrounds. This global perspective enriches students' experiences and prepares them for global citizenship and cross-cultural collaboration.

Emphasis on Alternative Education and skill based learning

While technical skills remain crucial, there is a growing recognition of the importance of soft skills such as communication, empathy, and resilience. Institutions are incorporating well-being programs to support students' mental health and overall wellness. A balanced emphasis on both technical and soft skills equips graduates with the holistic competencies needed for success. Traditional degrees are no longer the sole measure of educational attainment. Alternative credentials, such as digital badges and certificates, are gaining acceptance as valid indicators of skills and knowledge. Block chain technology is being explored to provide secure and verifiable records of achievements. Today, alternative education providers primarily serve

college degree holders—both recent graduates seeking a bridge to employment and those further along in their careers looking to gain new skills without the commitment of going back to school.

Collaboration between academia and industry is on the rise. Partnerships with businesses provide students with real-world experiences, internships, and opportunities to work on industry-relevant projects. This interaction bridges the gap between theoretical learning and practical application.

Education is no longer confined to the years between 6 and 22; the distinction between learning and earning phases has become blurred. To stay pertinent, individuals must continuously engage in training, even after formal education. Even if educational institutions transform to ensure that graduates are job-ready, individuals must persistently acquire knowledge throughout their lives to remain relevant. Flourishing in an era of rapid change necessitates individuals to cultivate the skill of lifelong learning.

The emerging higher education terrain is characterized by flexibility, innovation, and a dedication to fulfilling the diverse requirements of learners and society. While the conventional higher education model maintains its relevance, the infusion of technology, personalized learning, interdisciplinary methodologies, and a heightened emphasis on skills and well-being are moulding a more vibrant and all-encompassing educational journey. As we navigate this ever-evolving landscape, embracing these trends can equip us to thrive in a world characterized by ceaseless change.

I would like to take this opportunity to thank DSIMS for giving me the opportunity to pursue this excellent course that has helped me to overcome my fears which always held me back. It has brought a new dimension into my life to achieve a successful career ahead. Every single day at DSIMS, we were compelled to face new challenges that people face in the corporate world and in every challenge there was an opportunity that had helped us to grow as an individual personally and professionally.

The annual events in the B-school helped us to explore ourselves and our skills and helped us get our skills in place. Working for the Marketing Conclave-Touge during my time at DSIMS is one memory I cherish and am proud of it as it played a very vital role in developing me as a marketer. Being a part of the placement Committee, I was able to interact with the industry experts and got overall knowledge about how exactly departments work in an organization. Apart from all this, I am happy to have garnered skills that will be with me forever, Friends! I am proud to have the Faculty who will always be the guiding light in my life. Above all, it's always good to be back to the Alma Mater that has laid the foundation of my Career. So I hope to continue my association with DSIMS in whatever manner possible.

I had joined as a member and year by year through experience I became an IS director and then the HRD in my 3 years most beautiful journey. It's a combination of fun and learning. I had back to back most memorable trips to Himachal and Vizag (Vishakhapatnam).

I would like to thank placement team for giving me this opportunity to get my first job. It's been more than a year am working with my organisation and the best part is it's a 'Work from home' Getting such opportunities in this pandemic time was the most best part of placement. Really kudos for the hard work done by the 'Placement Cell' of the college. Thanks for giving me a lifelong unforgettable experience which I can cherish in part of my memories.

Memorable Events/ Journey in the Institution:

Stepping into LRMC was a stepping stone towards knowing myself better. I am grateful to LRMC for providing a stage which I had not imagined. The teachers in the college assisted me in acquiring trust in myself, and showed me what I can do. I developed interest in extra-curricular activities and enrolled myself as a volunteer of National Service Scheme (NSS) and it was a journey towards knowing my new self. I am also grateful towards LRMC as it put me in various leadership positions and I realised how to lead a team. I was the Student leader of National Service Scheme (NSS) and was also the Event Manager (Leader of a particular event) for the Inter-Collegiate Festival of our college "PANKH-A Desire to Fly." I really appreciate all the educators as they have enthused confidence and motivation in me. LRMC was the best phase of my life.

Our Gratitude to the Large Donors of

Rajasthani Sammelan Education Trust

Rajasthani Sammelan Education Trust today is a reputed name in the field of education with multiple educational institutions offering education from Nursery to post graduate studies in management and media studies. **Approximately 16,000 students** study across various schools and colleges located in the state-of-the-art RSET campus in Malad (Mumbai).

This transformation and growth of RSET has been brought about by some of the visionaries who were associated with the Trust since 1948 and had the far sightedness to empower the community through education. What started as a single school for the girl child way back in 1950's today has metamorphosed to multiple educational institutions and students.

RSET owes its gratitude to the benevolence of its **Large Donor families** who had the vision to invest for the cause of education way back in the early years and have continued to do it over the years, knowing fully well that **investment in knowledge pays the best interest**. And rightly so. From time to time all our **Large Donor families** who have been associated with RSET have seen their investment in education come to fruition and we are reaping the fruits of their vision through the various institutes and the infrastructural facilities that have been built at RSET some of which have been named as per the desire of our esteemed Donors and membership as per RSET rules were given as per the membership rules prevailing at that time.

All our Donor Trustees, Office Bearers and Managing Committee Members bring with them an extensive experience and knowledge of running their successful enterprises. It is largely due to their efforts, vision and commitment that RSET has grown in the size and stature. Our gratitude to all our Members for joining with us in our educational endeavours.

Thank you Donors

Our family of donors include illustrious business families, individuals, corporate partners, foundations and all those people who are committed to our philosophy of providing "Quality Education for All" and have been coming forward with their contribution from time to time to create an institution of educational excellence.

Through these columns, we thank and acknowledge the support of our donors for their generous contribution over the years. Your support and contribution plays an important role in helping Rajasthani Sammelan to achieve its mission of developing a community dedicated to achieving national and international levels of excellence in various fields of education.

Your generosity has significantly contributed and helped the students in various areas. Every donation that you make impacts the life of our students in some way or the other. Your contribution has helped us build various institutes of excellence with the best infrastructure that include state of the art computer labs, knowledge resource centre, communication centre, health centre, educational outlet, sports facilities and scholarships instituted for meritorious students. All our institutes have benefitted immensely from your support.

Undoubtedly, you as our esteemed donors have made Rajasthani Sammelan stand tall in stature and have helped it grow from time to time. Like you, there have been many others whose contribution to Rajasthani Sammelan way back in the early 1950s has been significant and notable. And we gratefully acknowledge their noteworthy contribution in setting up the edifice of this great institution.

We gratefully acknowledge the contribution made by Late Shri Kudilalji Seksaria who donated the land on which the current structure of Rajasthani Sammelan stands. This contribution cannot be valued in terms of money, and it would only undermine his contribution if we were to measure this in monetary terms.

At the same time, had it not been for the significant contribution of Rs. 50,000/- by Shri Brijmohan Ruia (Brijmohan Laxminarayan Ruia Charity Trust) way back around the year 1950, the landmark Sarvodaya Balika Vidyalaya would not have come up. A small dream way back in early 1950s has today paved the way for a number of institutions under the banner of Rajasthani Sammelan. As they say, "It all begins with a Dream".

We are proud to have you all as an integral part of the positive impact and an enduring legacy that we are creating at Rajasthani Sammelan. May your benevolence continue to bring about the change we wish to see in our educational system. We stand committed to spread our wings and fly higher. In this journey of growth, we seek your continued support.

We constantly endeavour to maintain accuracy in the list of donors and we thank you for the feedback in case of any discrepancy that has been noted. Should there be any errors or omissions in this list, we urge you to contact our Donations Officer on rs@rajasthani.org.in
